## Abstral

### Description

#### Abstral (fentanyl sublingual tablets)

---

##### Background

Abstral has one indication, the management of breakthrough cancer pain in patients with malignancies, who are already receiving, and are tolerant to, opioid therapy for their underlying persistent cancer pain. Abstral should only be prescribed by health care professionals who are knowledgeable in the use of Schedule II opioids for cancer pain and are registered in the Abstral TIRF REMS program (1).

Abstral has a high potential for abuse, addiction, and diversion. Abstral prescribing guidelines indicate that if more than 4 units are required per day, the dosage of the underlying opioid therapy should be titrated (1).

##### Regulatory Status

FDA-approved indication: Abstral is an opioid agonist indicated only for the management of breakthrough cancer pain in patients 18 years of age and older, who are already receiving and who are tolerant to opioid therapy for their underlying persistent cancer pain (1).

Abstral has a boxed warning regarding the risk of neonatal opioid withdrawal syndrome and fatal respiratory depression in patients treated with Abstral, including following use in opioid non-tolerant patients and improper dosing. Abstral is contraindicated in the management of acute or postoperative pain, including headache/migraine and in opioid non-tolerant patients. Abstral cannot be substituted mcg per mcg for other fentanyl products. The substitution of

---

Abstral for any other fentanyl product may result in fatal overdose. Outpatients, prescribers and distributors must be enrolled in the TIRF REMS Access program (1).

Safety and effectiveness of Abstral in patients less than 18 years of age have not been established (1).

### Policy

*This policy statement applies to clinical review performed for pre-service (Prior Approval, Precertification, Advanced Benefit Determination, etc.) and/or post-service claims.*

Abstral may be considered **medically necessary** for the management of breakthrough cancer pain in patients age 18 years old or older and if the conditions indicated below are met.

Abstral may be considered **investigational** in patients less than 18 years of age, and in patients that do not have a diagnosis of breakthrough cancer pain or who are not opioid tolerant.

## Prior-Approval Requirements

**Age** 18 years of age or older

### Diagnosis

Patient must have the following:

Breakthrough cancer pain – type or location of cancer must be specified

**AND ALL** of the following:

1. Patient is already receiving around the clock opioid therapy for underlying persistent cancer pain
2. Patient is tolerant to opioid therapy.

Patients are considered opioid tolerant if they are taking at least:

- a. 60mg of oral morphine/day
- b. 25mcg transdermal fentanyl/hour
- c. 8mg oral hydromorphone/day
- d. 25mg oral oxymorphone/day

---

- e. 30mg oral oxycodone/day
  - f. or an equianalgesic dose of another opioid for a week or longer
  - g. However, lower dosage requirements may achieve tolerance in renal impaired or elderly patients.
- 3. Prescribing healthcare professional should be knowledgeable of, and skilled in, the use of Schedule II opioids to treat cancer pain
- 4. Patient and prescribing healthcare professional are enrolled in TIRF REMS Access program.
- 5. **Initial dose** of Abstral must be for 100mcg, even if patient is already established on another fentanyl product other than Actiq
  - a. Actiq 200mcg converts to Abstral 100mcg
  - b. Actiq 400mcg converts to Abstral 200mcg
  - c. Actiq 600mcg converts to Abstral 200mcg
  - d. Actiq 800mcg converts to Abstral 200mcg
  - e. Actiq 1200mcg converts to Abstral 200mcg
  - f. Actiq 1600mcg converts to Abstral 400mcg

---

## Prior – Approval *Renewal* Requirements

**Age** 18 years of age or older

### Diagnosis

Patient must have the following:

Breakthrough cancer pain – type or location of cancer must be specified

**AND ALL** of the following:

- 1. Patient has remained on around-the-clock opioid therapy
- 2. Prescriber is knowledgeable of, and skilled in, the use of Schedule II opioids to treat cancer pain
- 3. Prescriber and patient are enrolled in TIRF REMS program

All requests are subject to approval by a secondary review by a clinical specialist for final coverage determination

## Policy Guidelines

### Pre - PA Allowance

None

### Prior - Approval Limits

**Dosage** 100 mcg: Up to 4 units / day

**Duration** 6 months

### Prior – Approval *Renewal* Limits

**Dosage** 100 mcg: Up to 4 units / day or  
200 mcg: Up to 4 units / day or  
300 mcg: Up to 4 units / day or  
400 mcg: Up to 4 units / day or  
600 mcg: Up to 4 units / day or  
800 mcg: Up to 4 units / day

**Duration** 6 months

## Rationale

### Summary

Abstral, a short-acting opioid, is indicated only for the management of breakthrough cancer pain in patients, 18 years of age or older, who are already receiving and are tolerant to opioid therapy for their underlying persistent cancer pain. Abstral should only be prescribed by health care professionals who are knowledgeable in the use of Schedule II opioids for cancer pain (1).

Prior authorization is required to ensure the safe, clinically appropriate, and cost-effective use of Abstral while maintaining optimal therapeutic outcomes.
