## Corticosteroid Powders

### Description

Mometasone Powder

---

### Background

Corticosteroid medications demonstrate potent anti-inflammatory activity that decrease inflammation through an unknown mechanism of action. However, corticosteroids are thought to act by affecting cellular signaling and immune function, which leads to the inhibition of potent inflammatory mediators. Topical corticosteroids can be absorbed from normal intact skin. Inflammation and/or other disease processes in the skin increase percutaneous absorption (1).

Clobetasol is commercially available in the following dosage forms: topical foam, shampoo, topical cream, topical gel, topical lotion, topical ointment, and topical solution.

Fluticasone is commercially available in the following dosage forms: topical cream, topical lotion, topical ointment, nasal spray and various aerosols and powders for inhalation.

Mometasone is commercially available in the following dosage forms: topical cream, topical lotion, topical ointment, nasal spray and as a powder for inhalation.

### Regulatory Status

FDA-approved topical indications: Topical corticosteroids are indicated for the relief of inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses (1).

## Policy

*This policy statement applies to clinical review performed for pre-service (Prior Approval, Precertification, Advanced Benefit Determination, etc.) and/or post-service claims.*

Corticosteroid powders may be considered **medically necessary** if the conditions indicated below are met.

Corticosteroid powders may be considered **investigational** for all other indications.

## Prior-Approval Requirements

### Diagnosis

Patient must have the following:

Inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses (including but not limited to hives, rash, eczema, dermatitis)

**AND ALL** of the following:

1. The requested dosage form is for topical use
2. The patient must have tried and failed and/or have an intolerance to an existing commercially available topical product
3. All of the active ingredients in the formulation are prescription (RX) only products and are FDA approved for inflammatory and pruritic dermatoses
4. The concentration of the final product will not exceed the FDA approved limit
5. It is not being used for cosmetic purposes (including but not limited to anti-aging, anti-wrinkle, hair growth/removal, scar prevention, scar diminishing, skin lightening/tanning)

---

## Prior – Approval Renewal Limits

Same as above

### Rationale

#### Summary

Topical corticosteroids have anti-inflammatory, antipruritic, and vasoconstrictive properties. Topical corticosteroids are FDA-approved for the relief of inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses (1).

Prior authorization is required to ensure the safe, clinically appropriate, and cost-effective use of corticosteroid powders while maintaining optimal therapeutic outcomes.
